- Microsoft Office Training

PROFILE:

Blending analytical acumen with technical expertise, I am an Energy Data Analyst with 2 years of experience in driving corporate energy efficiency. Leveraging advanced Microsoft Excel, I have a proven track record of executing cost-saving projects that directly impact production areas.

My unique value add lies in my background in Web Development (Laravel, React.js, Tailwind CSS, MySQL, and Git). I go beyond traditional data processing by designing and building interactive, web-based internal platforms. I thrive in cross functional collaboration, translating complex data into accurate, visual, and highly digestible insights to drive strategic management decisions.

EXPERIENCE:
